### Year of the Cobra (USA)

Since their inception in early 2015, Seattle based doom duo, YEAR OF THE COBRA, has garnered a lot of attention. After being discovered by famed Pacific Northwest blog site Doomed and Stoned in early 2016, they started to amass a solid following. The early rough mixes they released eventually became their debut EP, The Black Sun (2015), co-released by DHU Records (Netherlands), Devil's Child Records (US), and Heavy Metal Vomit Party (Slovak Republic). Soon after, they signed with heavy weights, STB Records, who would eventually release their debut full length LP worldwide.

YOTC hit the road hard in 2016 with multiple West Coast tours and a full US tour. To promote their nation wide tour, they released a 7" split with tour mates and legendary stoner rock band, Mos Generator. The 7" sold out within days as the two bands toured across the US. With the excitement at full steam, their highly anticipated debut full length, ...In The Shadows Below, was featured and streamed live via noisey.vice.com on October 26, 2016 to high acclaim, and was available worldwide on October 28th via STB Records on all formats (Vinyl, Cd, Tape, Digital). Since it

### Toke (USA)

Toke was born in the swamps of North Carolina in early 2014. A blend of doom, blues and riffs that will get anyone high and keep their head banging. Since day one, Toke have been touring, putting out albums and getting the country stoned on their strain of music. With the release of the most currently album 'Orange' the buzz is high and so is Toke. Unable to stay still for very long, much of the country has head banged with Toke playing 150+ shows and festivals including Doomed and Stoned Fest, Psycho Las Vegas and Denver Electric Funeral Fest! Next up is 3 weeks in Europe and their ready to head bang and get the world high on their strain of doom!
