Jungle Rot (USA)

Shots' firing overhead, out of breath, thankful to be alive, an exhausted, courageous soldier takes cover in a nearby trench. Overcome with tragedy, the cadet looks down to carefully remove his worn down combat boots to discover his feet numb and blue, knocking him back with an overwhelming smell of decay and gangrene. This phenomenon is known as "jungle rot". With a little imagination, visualize this horrifyingly grotesque predicament as it would be in heavy metal form - teeming with despair, brutality, darkness and volatility. The sinister picture you have just painted comes to life in four-piece death metal act JUNGLE ROT, who has been triumphantly destroying the metal scene since 1994.

Ultra-Violence (IT)

Ultra-Violence are an Italian thrash metal band from Turin, Italy formed in 2009. They released their debut EP "Wildcrash" in 2012 and their first album "Privilege To Overcome" one year later. The album received positive approval from all over the world and was included in a large amount of magazines and websites as one of the best thrash metal albums of 2013. That led them to play a good amount of live shows in Europe catching the ear of English extreme metal label Candlelight Records and soon after the band agreed to join them. Their second album "Deflect The Flow" was released in 2015 taking the band to a new level and expanding their fanbase. The band's most recent album "Operation Misdirection" was released in July 2018 via Candlelight/Spinefarm records.
