Incantation (USA)

A megalith of the death metal underground whose New York scene association, aside the pioneers of the genre, head into a new chapter. Ever precise to their origins the band has witnessed and experienced the ebb and flow of the scene they helped create. Whether due to giving their support by providing some their first tour experience. Or having that equaled playing with such an array of musicians and bands in and outside the confines of the band. With 10 studio albums, videos even a TV commercial. Numerous releases being in the form of demo cassettes, 7", LP, CD dedication still holds true with tireless effort. Hall of Fame, Top 10 lists honoring their discography through publications, internet and radio. Having gathered supporters and fans all along the 25 year journey. Circles devoted to all/specific eras or an audience's first encounter. Incantation has crushed venues, festivals, and clubs with their rabid attendance. From North, Central and South America. Canada, Europe, Scandinavia, Australia or Japan all have welcomed the inferno that scorched their lands. With this in mind we are proud to announce the long awaited release of XXV! Marking Incantation's quarter century, we have created a strictly band-accessible gatefold 12" LP. Drawing from their work, dawn to the present. Artwork created, as in 1990 by the great Chris Moyer and mastered by Dan Swano of Unisound Studios. You've been Warned!
