Salzburg, November 2024. 6 years ago to be exact, by the lack of regular techno events in Salzburg, the Tiefdruck collective was founded. Our shared passion, especially for minimalist techno with psy elements, has driven us to turn an idea into reality. 6 years is a milestone that shows us how wonderful the last few years have been with all of you. Six years full of music, creativity, euphoria and unforgettable moments that we have only been able to experience thanks to you, our crew and the friends who have been with us since day one. From our first projects together to the roaring nights that made the dancefloors shake, every experience has made us stronger and brought us closer together. Tiefdruck is more than just a collective - it's a family. Every party, every meeting and every laugh has shown us how important cohesion and passion are. These six years would have been unthinkable without you. Your support, your energy and your belief in what we do have fuelled and inspired us. We look forward to many more years together full of music, art and countless magical moments! So let's raise our glasses - to the past that shaped us and to the future that will continue to bring us together! We celebrate BIG and in style with our good friend Berto (DE) and a second upstairs floor hosted by Lauter Klabauter and wundertüte. Mainfloor support by the Tiefdruck All-Stars.
