Made in Iron

Every great band deserves a great tribute band and British heavy metal icons Iron Maiden are no exception. The Swedish band Made in Iron are highly dedicated and professional in their tribute. The band primarily focusing on the classic era (The Number of the Beast, Piece of Mind, Powerslave, Somewhere in Time, Seventh Son of a Seventh Son albums), but mix it all up perfectly with a constantly changing set list including other masterpieces and deep cuts throughout Iron Maiden entire career. These are the songs with which they grew up and they faithfully perform them accurately with every single note in place from the beginning to the end. Besides the high standard Musical performance, the band focusing of the very core of what is seen as the Iron Maiden mentality – the interaction with the audience rather than just being a poorly looking Look-alike-band without a Soul Repeatedly touring and playing in front of Iron Maiden's hardcore fans across the European scene and headlining several Official Iron Maiden Pre-Parties - fans repetitively say that they have seen no better tribute band throughout the years than Made in Iron. That says it all: This is not a roughly put together tribute and Made in Iron is truly one of the best tribute bands out there. Their high energetic shows are surely something you won't want to miss!
