REZN

Chicago-based cosmic and cataclysmic quartet REZN have mined the stark monochromatic depths of underground metal and fused them with the kaleidoscopic delights of psychedelia, prog rock, and shoegaze. From their inception, the band have been fiercely independent with a fully realized aesthetic and a fervent cult following. As knowledgeable gear heads, experienced sound engineers, and seasoned DIY veterans, REZN have been able to create a body of work devoid of any sonic compromises in their speaker-rattling dirges and heady lysergic forays. Their four self-released albums—Let It Burn (2017), Calm Black Water (2018), Chaotic Divine (2020), and Solace (2023)—have all gone through multiple vinyl pressings without any distribution or retail presence, and the international underground heavy psych world has routinely selected the band for distinguished festival slots across North America and Europe.

Khan

Khan meld hazy psychedelia and heavy stoner riffs with a penchant for progressive rhythms and almost dirge-like, industrial- scale crescendos. The songs are lyrically evocative, often exuding a sense of despondency and melancholy. Vocally, they waver from ethereal falsetto and hypnotic crooning to impassioned wailing punctuated by occasional guttural screams.
