## **Venom Inc.**

Put together by Dolan for a one off show, bringing the second true era Venom back together in Lauda Konigshofen. Halfway through the Mpire Of Evil set at the Keep It True festival three Venom members were reunited for a couple of Venom classics. The hall exploded with sheer enjoyment. Mantas on guitar, Demolition Man on bass and vocals were joined by drummer Abaddon and so the Prime Evil line up of Venom was back on stage. When promoters got word of this reunion, a bomb exploded; offers from all over the world followed and so the band decided to have a go at it once more. The name Venom Inc was adapted and for the next few years, the power trio toured the earth up and down, to much success. 2017 saw the release of the album Avé - an album very well received by press and fans who expressed how happy they were that the true keepers of the Venom spirit were back. Venom Inc never gave up and started work on their second album, 'There's Only Black', released on Nuclear Blast in 2022, to much acclaim. With countless highlights behind them - Poland & Rock to half a million people, LATAM with Possessed, Hammersonic in Indonesia as well as other high profile festivals and a full EU tour with Krisiun & Hate, the unholy trinity began demoing for the new album due out 2026. 2 live album releases are coming as well as a new visual product and new studio album. If the old phrase was 'here lies Venom'!! Then the new flag reads, 'here stands VenomInc'!
